

CONGRATULATIONS!

Interested?

You are interested to leave Ghana for a shorter or longer period of time and join the staff in hospitals, clinics and elderly care in The Netherlands. In the Netherlands is a great demand on many different levels, for which the honour is great and the reward is very, very attractive.

This website might explain to you the in's and out's, making it easier taking this decision that might change the life of you and your family for ever.

Who you are talking to

Dutch Technology Centre (DTC) is an engineering and consultancy company that is active in Ghana since the beginning of the '80s. We have conducted successful or less-successful projects for WorldBank, United Nations, USAid and Ministries of Health, Education and Trade & Industry.

Why are we doing this

When we participated in the construction of the Regional Hospital in Cape-Coast under authority of Hon Eunice Emissa-Broekman, (later Ambassador in The Hague) our attention was called for the great surplus of medical staff that was available to fulfil vacancies. Simultaneously is the demand in The Netherlands and Germany great and expanding.

Your interest is protected

To arrive at an utmost efficient scenario whereby you are very well protected in your position as expatriate, we have established independent entity: **Tectumque.com** with offices in Accra, in Amsterdam, and very soon in Germany.

Credit Facility

To qualify for a vacancy in The Netherlands you have to do an investment in yourself. Costs must be incurred to: learn the Dutch language, you need a work-permit and passport/visa and create your own living (pay rent) until your first pay check arrives after 6 to 8 weeks. ZENITH bank (London & Accra) in cooperation with International Insurance Brokers AON, banks are interested to facilitate you.

Your way forward

Please send us completed [CONTACT FORM](#) and we will provide you with your own Unique Registration Number for further action.
